1. Select the desired **Printer**. In this case EPSON Stylus Pro 4880 MATTE black has been selected.
2. Select **Print Settings**...

3. Select **Show Details** to reveal more options necessary for printing.

4. **Paper Size** will most often be set to **US Letter** (8.5 x 11). If using the Epson 4900, you must select US Letter (sheet) or the printer will think you are printing from a roll.
5. Select **Print Settings** from the drop down.

6. Select the **Media Type**. In this case, Matte Paper/ Enhanced Matte Paper is being chosen.

7. Make sure **Color Mode** is set to **Off (No Color Management)**.

8. **Output Resolution** should be set to **SuperPhoto - 1440 dpi** and **High Speed checked**.

9. Select **Save** to return to the main printer dialog screen.
10. Once you have returned to the **Photoshop Print Settings** window, select **Photoshop Manages Colors** from the **Color Handling** drop down.

11. Select the appropriate **Printer Profile** from the drop down. In this case Pro4880 EMP_MK is being selected, which corresponds to the Printer and Media Type previously selected.
12. Select **Print** to send your job to the Printer.
